BREWER'S NOTES

Rob, the head brewer at Dangerous Man, and I decided we had so much fun using tea in our collaboration brew for In Cahoots, that we wanted to do another tea beer and take it a step further. This time around, we worked with the folks at Tea Source to create a unique tea blend for each of our respective breweries, then designed a beer around what would work. We decided that a rich Amber Ale would provide a harmonious backdrop for both of our tea blends.
